All performance returns are presented net-of-fees and include the reinvestment of dividends and capital gains. Benchmark comparisons are presented gross-of-fees.

Past performance may not be indicative of future returns. No current or prospective client should assume that the future performance of any specific investment or strategy will be profitable or equal to past performance levels.

All investment strategies have the potential for profit or loss. All strategies have different degrees of risk. There is no guarantee that any specific investment or strategy will be suitable or profitable for a particular client.

Historical performance results for investment indexes and/or categories typically do not show the impact of transaction and/or custodial charges or the deduction of an advisory fee, which may decrease historical performance results. There can be no assurances that a strategy will match or exceed its benchmark.

Some performance returns do not represent actual trading using client assets but were achieved through retroactive application of a model designed with the benefit of hindsight. Model returns have inherent limitations. Specifically, these returns do not represent actual trading and may not reflect the impact of material economic and market factors on the adviser's decision-making if the adviser had actually managed the client's money during this time frame.
